SUMMARY

Recent Information Technology graduate with hands-on experience in programming, web development, and database management through academic and self-driven projects. Skilled in problem-solving, teamwork, and technical documentation, with a strong interest in building practical and efficient IT solutions. Eager to begin a professional career and contribute to real-world technology projects in a dynamic work environment.

EDUCATION

- Pune Institute of Computer Technology** Pune, India
Bachelor of Engineering - Information Technology August 2022 - July 2026
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
- New Indian Model School** Sharjah, U.A.E
HSC - Science 80%
- New Indian Model School** Sharjah, U.A.E
SSC - Science 70%

SKILLS SUMMARY

- Languages:** Python, C, C++, JavaScript, SQL, JAVA
- Frameworks:** TensorFlow, Keras, REST API, NodeJS,
- Web Tech:** HTML5, CSS3, React.js, Bootstrap, Android Kotlin
- Tools:** Docker, GIT, PostgreSQL, MySQL, SQLite, MongoDB
- Software Dev:** DSA, OOPs
- Soft Skills:** Leadership, Writing, Time Management

PROJECTS

- AI Spiritual Assistant:** (Capstone Project) Developed an AI-powered web application using Python, Streamlit, and Gemini API to generate simplified and context-aware interpretations of sacred texts through prompt engineering and multiple interpretation modes
- Offline Disaster Management Kit:** Built an offline-first Android application in Kotlin to assist users during emergencies without internet access. Integrated Google Location API and SMS permissions to send SOS alerts with location details to emergency contacts.
- Weather Forecast Android App:** Developed an Android application using Kotlin and Android Studio to fetch and display real-time weather data by integrating public RESTful APIs. Implemented a user-friendly UI using Android layouts to enable city-based search and clearly present current weather conditions, temperature, and humidity
- Airplane Management System:** Developed a Python-based management system to handle airplane operations, flight schedules, and passenger records. Implemented MySQL database integration for efficient storage, retrieval, and management of flight and passenger data.

INTERNSHIPS/CERTIFICATIONS

- Palo Alto Networks** Virtual
Cybersecurity Virtual Internship Jan 2025 – Mar 2025
 - Learned cybersecurity fundamentals including threat detection and mitigation strategies.
 - Completed practical exercises on network security and vulnerability assessments
- Google** Virtual
Android Developer Virtual Internship Oct 2024 – Dec 2024
 - Developed Android applications using Kotlin, focusing on user-friendly interfaces and real-time data integration.
 - Gained hands-on experience with REST APIs and Android Studio.
